DHOLERA CHIP PLANT | PSMC HAS GIVEN US ACCESS TO A WIDE PORTFOLIO OF TECHNOLOGY: TATA CHAIR NATARAJAN CHANDRASEKARAN

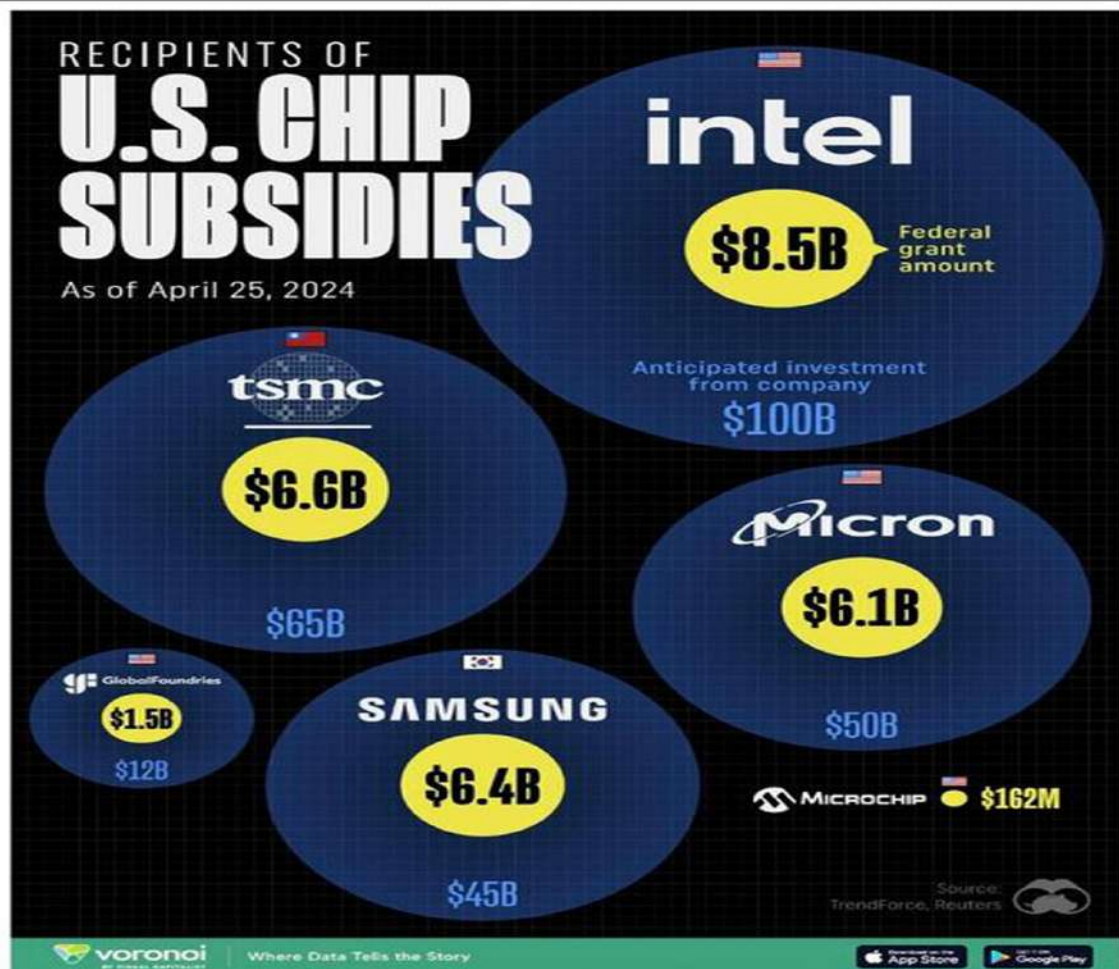

India's semiconductor industry is gaining momentum with Tata Group's Dholera plant set to unveil the nation's first indigenous chip by 2026. With a massive investment of Rs 91,000 crore, the joint venture between Tata Electronics and PSMC promises a manufacturing capacity of 50,000 wafers per month

TSMC, the world's most valuable chip firm, has six fabs within Hsinchu and a research centre. (Express photo by Soumyarendra Barik)

JUST ABOUT four decades ago, it was a town renowned for its tea farms and infamous for its snakes. Today, it is home to global chipmaking excellence. A key driver of Taiwan's economic turnaround, about 80 kilometres from its capital, is the city of Hsinchu — and its famed Science Park.

Hsinchu's story holds key lessons for India's promised chip city of Dholera in Gujarat, a region roughly the size of Singapore on which New [Delhi](#) has pinned its hopes of creating its own Silicon Valley.

TATA ELECTRONICS PREPARES GROUND FOR HIGH-END CHIPS

After the recent groundbreaking of its Rs 91,000-crore semiconductor fabrication plant, Tata group, along with its technology partner Powerchip Semiconductor Manufacturing Corporation (PSMC), has started work on producing the high-end chip technology of 14 nanometer (nm).
